

Reference No. 6.12

EMPLOYED WAGE AND SALARY EARNERS : AUSTRALIA, DECEMBER 1975

PRELIMINARY

MAIN FEATURES

The following figures refer only to civilian wage and salary earners excluding those in agriculture and private domestic service.

- During December 1975 employment decreased by 18,200 persons (10,300 in seasonally adjusted terms).
- Male employment fell by 5,100 and female by 13,000.
- Private employment decreased by 8,300 persons and government by 9,900.
- Increases were recorded in retail trade (3,400) and transport and storage (2,600) but these were more than offset by decreases in education (10,600), construction (6,400) and manufacturing (6,000).

EXPLANATORY NOTES

Introduction

This preliminary statement will be followed in due course by the monthly bulletin *Employment and Unemployment* (Reference No. 6.4) which gives information in greater detail.

Reference period

2. Current data supplied by reporting enterprises or establishments generally refer to persons on the payroll for the last pay-period in each month.

Scope of Estimates

3. The series in this statement relate only to *wage and salary earners*, not the total labour force. The statistics therefore exclude employers, self-employed persons and unpaid helpers. Also excluded because of the inadequacy of current data, are employees in agriculture and private households employing staff, and some part-time employees. For the sake of brevity, wage and salary earners are referred to in the tables as 'employees'.

4. Persons who are on paid leave or who work during part of the pay-period and are unemployed or on strike during the rest of the period are generally counted as employed. Those not shown on employers' payrolls because they are on leave without pay, on strike or stood down for the entire period are excluded.

Method of estimation

5. The estimates are based on benchmarks derived from the results of the 1971 population census and other relevant sources, such as special returns from government bodies and the Bureau's economic censuses and surveys. Month-to-month changes shown by current returns are linked to the benchmark data to derive the monthly estimates. Current returns are of three main types :

- . payroll tax returns
- . returns from government bodies
- . other current employment returns (e.g. for hospitals).

6. Recorded employment obtained from these sources is estimated to account for about 90 per cent of the total number of employees in the industries covered. The balance (that is, unrecorded private employment) is estimated.

Government employment

7. Government employees comprise not only administrative employees but also all other employees of government bodies (Australian, State, local and semi-government) on services such as railways, road transport, banks, postal and telecommunications, air transport, education (including universities), radio, television, police, public works, factories and departmental hospitals and institutions.

NOTE. Any discrepancies between totals and sums of components in tables are due to rounding. The figures shown are subject to revision.

NOTE. Inquiries concerning these statistics may be made by telephoning Mr J. Christensen on 52 6655 or, in each State capital, by telephoning the office of the Australian Bureau of Statistics.
